Ahmed Bečirević

Currently studying IT, aspiring software engineer

I am second year IT student at International Burch University. I really like coding and technology. Looking forward to upgrade my knowledge in the software engineering field, gain new experiences and connections. I have worked on designing MySQL databases, have a few simple Java projects, and I am currently working on developing a full stack application (PHP, Flight PHP, JS) which is approximately 20% finished. I have got a basic knowledge in Python and a more advanced knowledge in C.
